

AYŞEN SAVCI (1960, Ankara)

Formally educated as an Industrial Engineer, Ayşen Savcı had a professional work life covering several executive roles both in Turkey and Sweden including diplomatic missions. At September 2011, she joined a glass artists collective and started to work on artistic techniques on enameling and forming glass in kilns. She had the opportunity to attend workshops with both Turkish and international prominent artists, covering different techniques for kiln forming glass as well as sand casting. Meanwhile she continued to paint in order to develop further and diversify her artistic capabilities. Ayşen Savcı currently continues her work of creating kiln casted glass sculptures at her own studio, Studio Volcano, in central Istanbul. (www.studiovolcano.com)

In short time, she realized several solo exhibitions and took part in group exhibitions and art-fairs. Her work can be found in private collections in Istanbul, Ankara, Bursa, Eskisehir, Milano, London, Athens, Stockholm, Gothenburg, Malmo, Phuket, Chicago, Sydney.
